

Pipeline Ancillaries

Separators AS 2

Combined Valve with Integrated Trap

Technical Data

Connection DN	15 - 50
Connection G	1/2 - 2
Nominal Pressure PN	16
Operating Pressure	0 - 13 bar
Collection Efficiency	max. 1200 l/h
Temperature	190 °C
Medium	gases and steam

Description

Centrifugal separators use the cyclone principle to separate automatically liquids, solids and steam from gas flows while the gas is under operating pressure. The liquid trap built into the separator body operates instantaneously and its operation is not impaired by backpressure or pressure fluctuations. The collected liquid is safely drained by the float control. No additional energy input is required.

Separators type AS2 are of inline design and have their drain outlets at the bottom. Being entirely constructed of corrosion-resistant stainless steel, they can be used universally, i.e. especially for corrosive media.

The optimal separation capacity is achieved at a flow velocity of 25 – 30 m/s. The max. flow velocity should not exceed 35 m/s.

Top and bottom sections of the valve body are connected by a clamp ring and two bolts. Servicing/maintenance is easy and does not call for special tooling.

Standard

- » all stainless steel construction (CrNiMo steel)
- » quick-release body clamp ring
- » built-in liquid trap

Options

- » various seal materials to suit your medium
- » expansion pipe connection in body top section for separating liquids from compressed air or gases
- » other connections on request
- » special designs on request

Product features in brief

- » inline design with drain outlet at the bottom
- » built in steam trap
- » compact and lightweight thanks to deep-drawn components
- » corrosion-resistant CrNiMo steel
- » various connection options

Please state working pressure range when enquiring or ordering.

Operating instructions, know how and safety instructions must be observed. All the pressure has always been indicated as overpressure. We reserve the right to alter technical specifications without notice.

Collection Efficiency [l/h] and Pressure Ranges [bar]

Δp bar	G 1/2 - 1, DN 15 - 25 pressure range bar			G 1/2 - 2, DN 40 - 50 pressure range bar
	0 - 2	0 - 6	0 - 12	0 - 13
0,1	70	19	6	220
0,2	100	28	9	320
0,5	160	40	12	710
1	230	70	18	980
2	350	110	27	1200
4	-	160	46	1200
6	-	200	50	1200
8	-	-	60	1200
10	-	-	70	1180
12	-	-	75	1030
13	-	-	-	950

max. Flow Rate
