

DG Series – High Flow

- ▶ MOPD: 900 PSI (62 Bar)
- ▶ C_v Range: 0.045 to 0.880 (K_v Range: 0.038 to 0.748)
- ▶ 10 Watts

For maximum flow in a miniature solenoid valve the DG Series delivers a wide range of C_v (K_v) values and maximum operating pressures. The DG Series is also available in multiple body materials, seal materials, coil constructions, voltages, and wattages. Proven to perform for millions of cycles without failure, the DG valve – as with the entire valve series – is ideal for manifold configurations, sub-assemblies, and complete fluidic systems. The DG Series is the largest in a progression – AG Series and BG Series – of the highly flexible, modular design, (general purpose) valves.

Typical Applications

- Agriculture
- Defense
- Sterilization Equipment
- Industrial Automation
