F-6K In-line or Bypass Filter

The F-6K in-line or bypass filter has been designed with bar stock construction to provide reliable and economical filtration of streams having pressures up to 6,000 psig (41.37 MPa) at 70° F (20° C).

Materials of construction (standard) are 316 stainless steel and Teflon® for maximum service capability at economical prices. If a greater level of corrosion protection is required, this unit can be made (option) from Monel® or Hastelloy® C-276. The sintered 316 stainless steel filter element, with filtration ranges between 2 and 55 microns (μ), can be easily changed without removing the filter from the line. Standard connections are $\frac{1}{4}$ " FNPT. The optional bypass port is standard as $\frac{1}{8}$ " FNPT.
